

FOX[®] 1090 **SWING FRAME GRINDER**

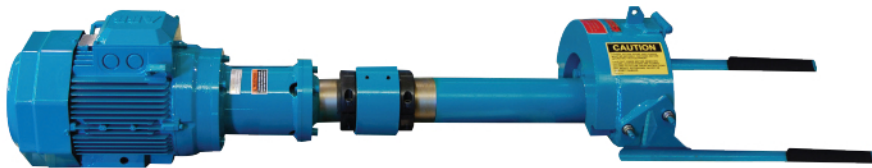

Excellent Visibility & Outstanding Maneuverability

One Vulcan Drive, Helena, AL 35080 | +1 (205) 663-0732
sales@vulcangroup.com | www.vulcangroup.com

1090 SWING FRAME GRINDER

- With the wheel turned 90 degrees from the typical swing grinder, the operator has much better visibility while grinding.
- A superior Hanger System allows for a perfectly balanced machine. It can be easily rotated for grinding on either side of a casting.
- The wheel remains square with the work as the operator follows the parting line/gate areas along the length of the casting.
- Ideal for use with a **Fox**® Casting Positioner
- Allows flat or curved areas, as well as corners, to be cleaned as the casting is rotated.

Features

- Motor starter package included
All units include an electronic "Soft Start" starter package minimizing starting torque.
- Direct Drive
Heavy-duty Fox quality grinding wheel spindle is directly coupled to the motor.
- Easy wheel change
- Adjustable handle bars
